

“International Workshop on Proximity Data, Multivariate Analysis and Classification”

**(Annual meeting of the SEIO Working Group on
Multivariate Analysis and Classification, AMyC)**

Granada, October 10, 2014

The International Workshop on Proximity Data, Multivariate Analysis and Classification will take place during October, 9 -10, 2014 in Granada (Spain). It is organized by the Multivariate Analysis and Classification Spanish Group AMyC (SEIO). The Spanish Group of Multivariate Analysis and Classification is a Working Group of more than 50 researchers from all the Spanish universities. Every year, the Working Group organizes a meeting to promote the communication between its members and between them and other researchers, and to contribute to the development of the Multivariate Analysis and Classification field and related problems and applications. The last meeting took place in Castellon, September 2013, during the meeting of the Spanish Statistical Society.

The topics of interest comprise any related problem to Multivariate Analysis and Classification both from a theoretical or a computational point of view, and their applications. It also includes problems related to unsupervised or supervised statistical learning related to big data analysis.

Researchers and practitioners are invited to present works in the form of oral communications or poster. For the participation, the submission of a short abstract is required. A registration form must be sent by email to jfvera@ugr.es before September, 20 with the following information: name and position, university, email, presentation title, authors and abstract (max 1000 words).

Organizing Committee:

José Fernando Vera, UGR (jfvera@ugr.es)

Leandro Pardo, UCM (lpardo@mat.ucm.es)

Carles M^a Cuadras, UB (ccuadras@ub.edu)

José Miguel Angulo, UGR (jmangulo@ugr.es)
